## مشكلة الملوحة في قضا؛ ابي الخصيب مخاطرها الزراعية وطرائق مكافحتها

ه.ه. عمار عبد الرحيم حسين جامعة البصرة/ كلية التربية للعلوم الانسانية قسم الجفرافيا

## **Abstract**

The problem of the salinity of the problems that has plagued Iraq, particularly in the area of alluvial plain, which is part of the study area, where the salinity is a real threat and an obstacle stands in the face of the sustainability of agricultural production in the district of Abi-alkasseb.

The study aims to clarify the most important indicators of risk of soil salinization in the elimination of agricultural production in it, and the development of fast processors and realistic to reduce the effects of this problem, has been shown through the study that there is a contraction and decline evident in the agricultural areas and have already been laid, Well as a change in relative crop structure of agricultural crops, and a decrease in the rate of yield dunum and failure in the cultivation of palm with shrinking is evident in the number of implanted them and their productivity, as well as the research noted a number of processors that believes that it will help in solving this problem in the study area
