

# Asthetic surgery

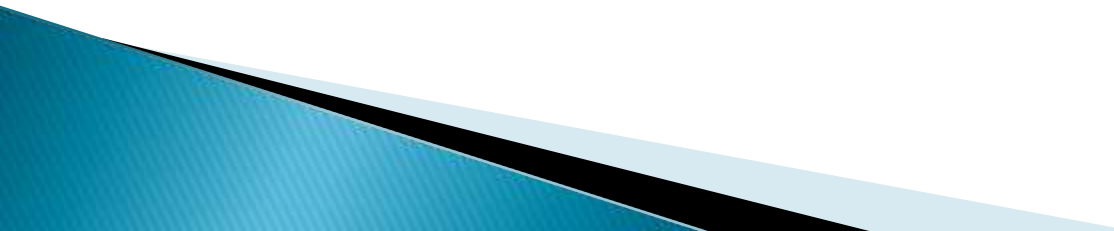

# Rhinoplasty

Is Aesthetic surgery of the nose , in which the patient Ask for changes to his nose , to correct a deformity or to improve his appearance.

The surgeon execute techniques that manipulate bone ,cartilage , soft tissue in order to produce results blend harmoniously with the rest of the face

**Aim** is to augment beauty and eliminate the unwanted points from the nose.

# Tips about Rhinoplasty

- Rhinoplasty does not give someone the nose of another one
  - It does not change the face of the patient but improve his appearance
  - it's done for deformed noses or normal noses
-
