# Mendeley groups and sharing

- ❖ Mendeley Group: is a structure in which a group of researchers can collaborate and share their libraries or selective references of their libraries.
- ❖ The group can be created in your desktop mendeley or in web mendeley. Mendeley Web will also allow you to search, join, and follow groups.

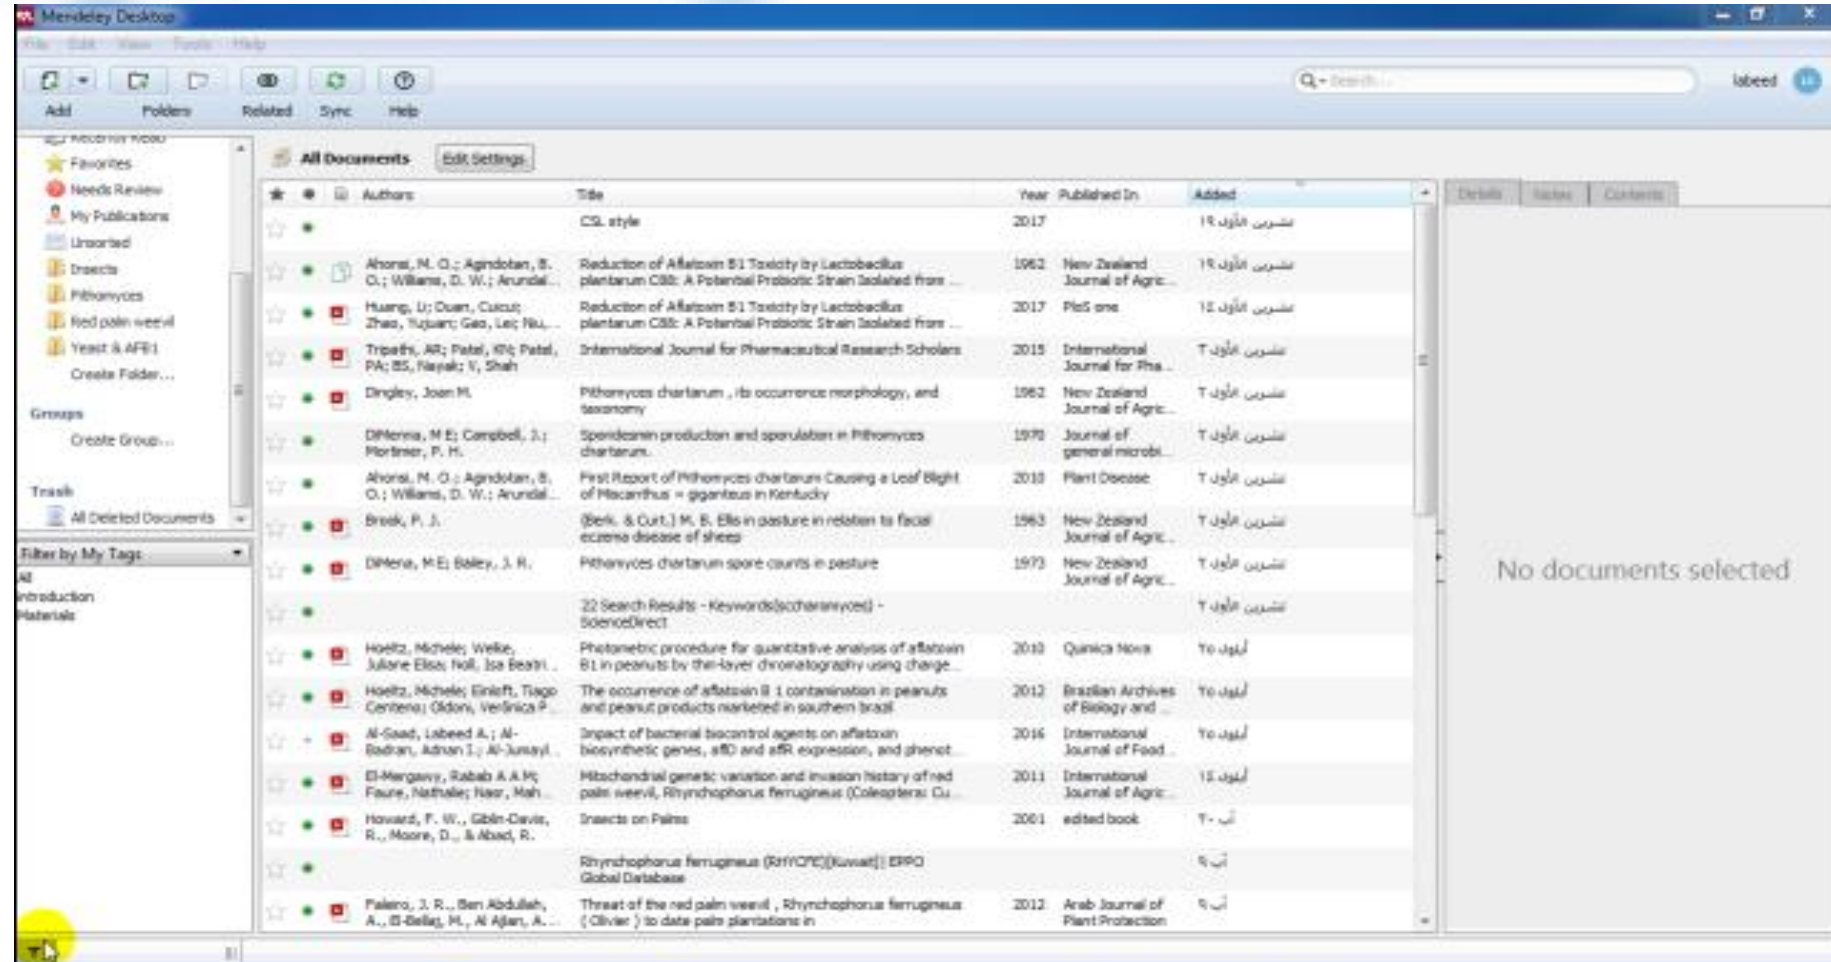

## Types of groups

- **Open**: An open group will allow anyone to contribute, become a member, or follow.
- **Invite-Only**: This group will allow you to share references, but not files, and can be viewed publicly.
- **Private**: Private groups allow you to share files and annotations between members.

These groups are not visible to others outside the private group.

# Mendeley groups and sharing

- ❖ To create group:
  - Open Mendeley
    - > in my library
    - > paart go to Groups
    - > Create Group.. >
    - give a name to the group >
    - give description >
    - select the group type >
    - create >
    - from members tab
    - invite members via Email >

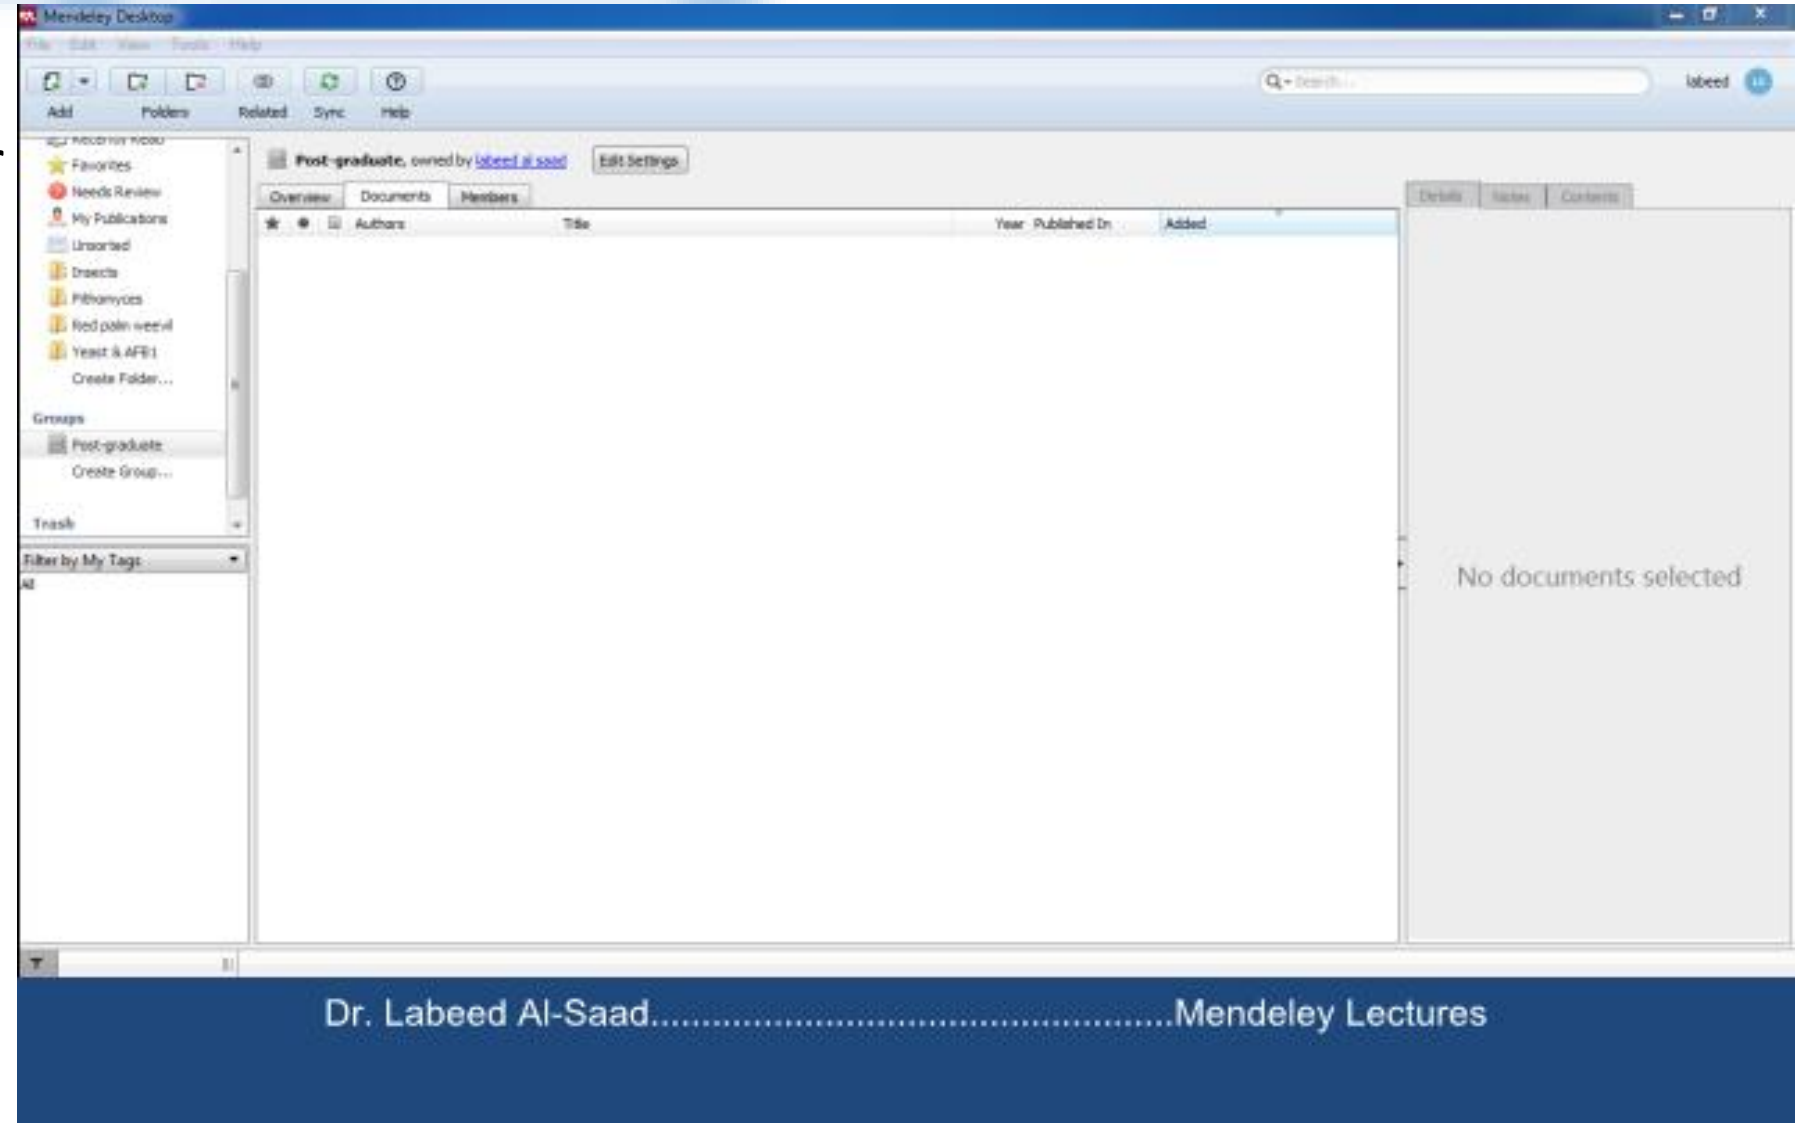

Dr.Labeed Al-Saad.....Mendeley Lectures

# Mendeley groups and sharing

> drag and drop documents from your library to the group folder

# Mendeley groups and sharing

- ❖ The group can be created and edited from your account on mendeley online, also when synchronizing the group an online copy will be created

The screenshot displays the Mendeley Desktop application window. The main area shows a list of documents with columns for Authors, Title, Year, Published In, and Added. The list includes various scientific papers related to aflatoxin B1 toxicity, Pithomyces charmarum, and the red palm weevil. A status bar at the bottom indicates that 236 tasks are completed.
