

## **Gender identity (psycho-genic sex ):**

It , a sense or feeling to be a male or female rather than biological  
**Sexual identity**

Refer to a biological sexual characteristic such genitalia, sex hormone  
,2ndry sexual characteristic .

It is found the gender identify is not determine by physical sex like  
chromosome, or gonads it ,or gonad hormones , and not by innate  
factor (instinction ). It is determined much more by learning and by  
cultural factors , especially in first 3 years of life . It mean by many  
experience of growing up (rearing).

### **Disorder of gender role**
